

zero *teen* Fatalities™

What is Zero Teen Fatalities?

Car crashes are the number one killer of teens in the United States. The Zero Teen Fatalities program strives to put an end to these fatalities by educating young drivers about the importance of being safe behind the wheel. Specifically, we encourage teens to:

Always Buckle Up

Always Drive Sober

Focus on the Road

Slow Down

Keep Your Cool

All of these behaviors are critical safety issues for teens. Our goal is to empower teens to spread the word among their peers about the consequences of unsafe driving behaviors, and in turn, save lives.

Top schools, advisors and students who participate in Zero Teen Fatalities will be invited to attend a special recognition weekend, including an invite-only Driver's Edge event, where they will be recognized for their outstanding work.

Driver's Edge teaches real-life emergency avoidance and response techniques and overall driver safety for teen drivers. This unique and innovative behind-the-wheel program was specifically developed to address the unacceptably high number of youth-related automobile crashes and fatalities that occur each year.

Get Involved

Zero Teen Fatalities uses a combination of school and classroom presentations, assemblies, administrator/educator meetings, parent presentations, driver's education classes and other venues and events to spread awareness about teen driving issues. The program hosts a variety of challenges to encourage teens to develop and spread traffic safety messages to their classmates, friends and family members.

Nevada residents who are current high school and college students between the ages of 15 to 20, their parents, teachers and school administrators, as well as other interested adults who wish to serve as advisors, are all welcome to get involved.
